

REMARKS

This application is a continuation application of U.S. Patent Application No. 09/991,880, which was filed on November 26, 2001.

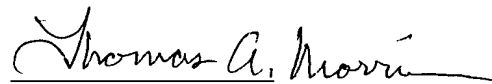

Status of Claims and Amendments

Applicant has amended the specification, the drawings and claim 11 by this Amendment. Applicant has also canceled claims 1-10 without prejudice or disclaimer. This leaves claims 11-21 pending in this application with claims 11 and 12 being the only independent claims. Claim 11 was merely amended to place it in independent form. The above amendments to the specification and drawings were made in the parent application (Serial No. 09/991,880). Entrance of this Amendment is respectfully requested.

Drawings

Applicant has filed herewith four (4) replacement sheets of drawings, including changes to Figures 2, 3, 6(a), 6(b) and 7. Specifically, the reference numeral 27 used to designate two different pins was replaced by the reference numerals 27a and 27b, to designate each of the pins with a different reference numeral in Figures 2, 3, 6(a), 6(b) and 7. Again, the above drawing changes were made in the parent application (Serial No. 09/991,880). Approval and entrance of the four (4) replacement sheets of drawings including Figures 2, 3, 6(a), 6(b) and 7 are respectfully requested.

Respectfully submitted,
